# 7<sup>TH</sup> INTERNATIONAL COURSE ON COLOPROCTOLOGY

Complex anal fistulas and  
Pilonidal Disease

VAAFT and EPSiT: new minimally  
invasive surgical treatments

**MENDRISIO**  
(Switzerland)

23-24 **MARCH** 2018

Dear Colleague,

many training courses have been held on the subject of perianal fistulas, and in particular, on the minimally invasive VAAFT technique (Video Assisted Anal Fistula Treatment). Participants have come from Italy and from overseas countries.

Thus, the technique has spread to numerous other countries and, up to now, there have been numerous tutoring requests. During the course, we will also discuss about the EPSiT technique (Endoscopic Pilonidal Sinus Treatment), conceived to treat visually the pilonidal disease in the minimally invasive way.

The course will be held in English language. This course will also include a session dedicated to the discussion of clinical cases, participants are invited to present a case that will be discussed. Participants that will send a case will be invited to realize few slides of the case, to be sent to the Organizing Secretariat 15 days before the start of the course.

The expert Italian and Swiss faculty is complemented by few of the most prominent surgeons worldwide, with the aim to provide a platform for a stimulating exchange of ideas and experiences.

I look forward to meeting you!

**Piercarlo Meinero**

## PROGRAMME

### First day Theoretical session

- 12.00 Registration - Welcome cocktail**
- 12.20 Greetings from the EOC Hospital General Manager** *G. Selmoni*
- 12.30 Course presentation** *F. Fasolini*
